

UTILITIES ADVISORY COMMITTEE MEETING

Wednesday, February 20, 2019 at 5:30 p.m.
Los Osos Community Services District Office
2122 9th Street, Suite 106, Los Osos, CA

COMMITTEE MEMBERS

Chuck Cesena, Chairperson
Vicki Milledge, Alternate Chairperson
Jan Harper, Member
Leonard Moothart, Member
Ron Munds, Member
Eric Silva, Member

STAFF

Renee Osborne, General Manager
Jose Acosta, Utility Systems Manager
Marti Brand, Administrative Clerk

AGENDA

1. **Opening at 5:30 p.m.**
Call to Order, Flag Salute, Roll Call
2. **Approve UAC Meeting Minutes of January 16, 2019**
(Recommend Committee Approval)
Presented By: Administrative Clerk Brand
3. **Review of District Water Shortage Contingency Plan and District Code Title 2**
(Review, Discuss and Provide Recommendations to the Board)
Presented By: Utility Systems Manager Acosta
4. **Discuss and Compile 2019 Work Plan for the Utilities Advisory Committee**
(Review, Discuss and Provide Recommendations to the Board)
Presented By: Chairperson Cesena
5. **Utilities Department Updates**
(Updates Only)
Presented By: Utility Systems Manager Acosta
6. **Update of February 6, 2019 Water Resource Advisory Committee Meeting**
(Updates Only)
Presented By: Chairperson Cesena
7. **Public Comments on Items NOT on this Agenda:** At this time, the public may comment on items not on this agenda. Each commenter is limited to 3 minutes and shall address the Chairperson.
8. **Schedule Next UAC Meeting** – Wednesday, March 20, 2019 at 5:30 p.m. unless otherwise noted.
9. **Closing Comments by UAC Committee Members**
10. **Adjournment**

ITEM 2

**APPROVE UAC MINUTES OF
JANUARY 16, 2019**

**Los Osos Community Services District
DRAFT Minutes of the Utilities Advisory Committee Meeting
January 16, 2019 at 5:30 p.m. at the District Office**

AGENDA ITEM	DISCUSSION	FOLLOW-UP
<p>1. Call to Order, Flag Salute and Roll Call</p>	<p>Chairperson Cesena called the meeting to order at 5:32 p.m. and led the flag salute.</p> <p><u>Roll Call:</u> Jan Harper, Committee Member – Present Leonard Moothart, Committee Member – Present Ron Munds, Committee Member – Arrived at 5:33 p.m. Eric Silva, Committee Member – Present Chuck Cesena, Chairperson – Present</p> <p><u>Staff:</u> Jose Acosta, Utility Systems Manager Marti Brand, Administrative Clerk</p>	
<p>2. Review of Fiscal Year 2018/2019 Draft Mid-Year Budget Adjustments Funds 200, 400, 500, 600, and 800</p>	<p>Utility Systems Manager Acosta provided a summary of the report as submitted with the agenda packet reporting that the Financial Advisory Committee reviewed the report at their December meeting. He reported that Fund 200 has 12 septic tanks needing decommissioning and staff has received quotes between \$20,000 to \$30,000 to begin the process and that Bayridge Estates has reserves to cover the full cost of the project. He reported that Fund 400 had no changes; that Fund 500 had an increase of \$400 for Disinfection Feed Pump and Rebuild Kits; that there was a decrease of \$2,000 for Computer Hardware which was offset by an increase for Computer Software of \$2,000. He reported an increase of \$500 for Miscellaneous Small Parts and Supplies; that there was an increase in Repair & Maintenance (R&M) for extinguisher and extensions kits of \$750. Mr. Acosta reported an increase for R&M Tools & Equipment; an increase in R&M for Minor Tools & Equipment of \$400 and a decrease of \$400 in R&M Grounds & Collections; that an increase in R&M Building & Structures of \$4,000 is requested and an increase of \$1,000 for the Water Conservation Program to purchase conservation items resulting in a mid-year budget increase of \$6,650. He reported that Fund 600 had minor adjustments from \$40,857.55 to \$41,407.55; and, Fund 800 had two requests for modifications changing from \$166,336.55 to \$167,686.44.</p> <p>Utility Systems Manager Acosta provided the Committee with a spreadsheet that projected revenue trends versus budgeted revenues.</p> <p>Public Comment – Julie Tacker commented that Fund 200 and Fund 400 narratives are incorrect; that all refinancing fees should have been included in the Mid-Year adjustments; and, asked what account the legal fees should be placed.</p> <p>Richard Margetson commented that Fund 500 revenues are higher than budget; that electric expenses are tracking higher and suggested that revenues should be included as part of the Mid-Year Budget adjustments. He disagreed with the use of the term “adequate revenues” in Fund 500; and, with the inclusion of \$25,000 for bond repayment, if the District was going to refinance the bond in Fund 600.</p> <p>The Committee unanimously recommend that the Board approve the Mid-Year Budget adjustments as discussed.</p>	<p>Action – The Committee unanimously recommend that the Board approve the Mid-Year Budget adjustment as discussed.</p>
<p>3. Approve UAC Meeting Minutes of November 14, 2018</p>	<p>Administrative Clerk Brand presented the minutes for Committee approval.</p> <p>Public Comments – None</p> <p>Committee Member Moothart moved that the Committee approve the UAC minutes of November 14, 2018. The motion was seconded by Committee Member Harper and carried by unanimous consent.</p>	<p>Action – File approved minutes.</p>

AGENDA ITEM	DISCUSSION	FOLLOW-UP
<p>4. January 16, 2019 Basin Management Committee Meeting Update</p>	<p>Chairperson Cesena provided a detailed update of the discussions at today's Basin Management Committee (BMC) meeting. He reported that the BMC will have a formal Request for Qualifications (RFQ) for Interim Executive Director Miller's replacement; that the appointment of BMC officers will remain the same next year with President Ochylski of the LOCSO, Vice President Zimmer of Golden State Water, Secretary Cote of S & T Water and Supervisor Gibson as Treasurer; that the Committee heard an update regarding the status of the Basin Plan Infrastructure. He reported on the discussion regarding the Cleath Harris Report on Los Osos Basin Plan Metric Trends Review and Infrastructure Program C Evaluation commenting that the letter from the UAC was well received and that the Committee's suggestions were reasonable; that the Committee adopted the Annual Budget; and, approved the proposals for Hydrogeologic Services by Cleath-Harris not to exceed \$62,700.</p> <p>Public Comment – Lynette Tornatzky commented that 40 acres were disallowed on the Basin boundary by the Department of Water Resources owned by the Bureau of Land Management.</p> <p>Richard Margetson commented that any water going to dryland farmers will be a financial loss for the community, that the community will never recoup the cost of putting in the lines, the right-of-way costs, and the water treatment.</p> <p>Jeff Edwards commented on the County's involvement with dryland farmers and inquired when the Board was going to reconsider; objected to the Goodwin Project receiving water; and, addressed his concerns regarding the progress of the Capital Improvement Projects.</p> <p>Julie Tacker commented on the potential well site and the concerns of the local residents.</p> <p>Chairperson Cesena reported that Executive Director Miller is currently working with the residents.</p>	<p>Action – Updates only, no action.</p>
<p>5. Utilities Department Updates</p>	<p>Utility Systems Manager Acosta reported that the Board approved a resolution regarding the 8th Street Water Yard Building Project's exemption from the County's fire sprinkler code which would add significant cost to the project. Mr. Acosta reported that the 10th Street reservoir dive revealed that repairs are needed to the hatch, the cathodic cap, and the ladder and that he will report back to the Committee after receiving the repair quotes.</p> <p>He reported that regarding the Bayridge Estates Septic Tanks Project staff has located two facilities willing to take the septic product and will have a total of three or four quotes by end of the week with prices ranging from \$17,300 to \$30,000; that the drainage panels are operational at Bayridge Estates and at Don and Mitchell Drainage Facilities and that the crew is currently constructing an awning to protect the panels. Mr. Acosta reported Bayridge drainage facility was waiting for a replacement pump; that the 16th Street drainage facility pumps have been installed with a significant reduction in noise with no flooding; and, that they are coordinating with Los Osos Middle School to complete the State's Lead and Copper sampling.</p> <p>He reported that the Well Meters had arrived but the crew is waiting for the arrival of the spool before beginning installation; and, that they will have three to four quotes from leak detection companies by the end of February to begin the Leak Detection Project in the spring.</p> <p>Public Comment – Julie Tacker inquired as to the goal for the final disposition of the tanks and the cost.</p>	<p>Action – Updates only, no action.</p>

AGENDA ITEM	DISCUSSION	FOLLOW-UP
5. Utilities Department Updates (continued)	<p>Jeff Edwards asked if the Committee could create a monthly usage report per capita per day; if the Palisades Well is being pumped; and, asked for the reasoning the District is pursuing acoustic leak detection</p> <p>Richard Margetson requested that if a usage trend chart is created that it contain the definition of the calculations.</p> <p>Utility Systems Manager Acosta responded that the water gap is part of the reasoning, along with the District's sandy soil type, that when leaks occur they do not surface; that losses were up to 15% last year but the year-to-date losses have lowered to 11%; and, that the District meter replacement program has narrowed the gap.</p> <p>He reported that when hired the leak detection company will do a thorough acoustic detection of the system looking at every valve, service connection meter and hydrant to pinpoint a leak and provide GPS mapping of our system. Mr. Acosta further reported that the District uses the Palisades Well to supplement flows as needed and that it is possible to provide a usage trend chart for two years.</p>	
6. Public Comments NOT on this Agenda	None.	
7. Schedule UAC Meeting	The next meeting of the Utilities Advisory Committee is scheduled to be held on Wednesday, February 20, 2019 at 5:30 p.m. unless otherwise noticed.	
8. Closing Comments by UAC Committee Members	<p>Committee Member Harper asked if it was necessary to turn in a Committee Application.</p> <p>Chairperson Cesena reported that currently the Ad Hoc Bylaw Committee is reviewing to clarify this but suggested that applications be submitted. He thanked the Committee for putting their hearts into this group.</p> <p>Committee Member Munds thanked the Committee and staff for their efforts.</p>	
9. Adjournment	The meeting adjourned at 7:00 p.m.	

ITEM 3

**REVIEW OF DISTRICT WATER
SHORTAGE CONTINGENCY PLAN
CODE TITLE 2**

February 13, 2019

TO: LOCSD Utility Advisory Committee
FROM: Renee Osborne, General Manager
Jose Acosta, Utility Systems Manager

SUBJECT: **Agenda Item 3 – 2/20/2019 Utilities Advisory Committee Meeting**
Review of District Water Shortage Contingency Plan and District Code Title 2

President
Marshall E. Ochylski

Vice President
Charles L. Cesena

Directors

Battalion Chief
George Huang

DESCRIPTION

At their January 10, 2019 Board meeting, the Board of Directors directed staff to present the Water Shortage Contingency Plan and Title 2 for review and discussion. Specifically pertaining to water leak credits.

STAFF RECOMMENDATION

I recommend that staff modify, as discussed:

1. ***Water Shortage Contingency Plan***
2. ***Title 2 of the District Code***
3. ***Or both Water Shortage Contingency Plan and Title 2***

For presentation to the Board of Directors for their approval.

DISCUSSION

At the January 10, 2019 Board of Directors meeting, the Board directed staff to present the District Water Shortage Contingency Plan along with Title 2 of the District Code for review and discussion. The Board directed staff to present both documents to the Utilities Advisory Committee for review, discussion and recommendation on possible updates. The directive was specifically to review the sections pertaining to leak credits for District customers.

Currently the District is adhering to the Stage III Emergency of the Water Shortage Contingency Plan. Stage III prohibits any leak adjustment credits from being awarded by the General Manager. Attached is a copy of the Water Shortage Contingency Plan for review.

Section 2.01.20 of Title 2 of the District Code specifies Credits for Fixing Water Leak, which is attached for review. Some specifics to this section are:

- **Application:** The General Manager shall make available to any customer an application form that customers can use to apply for a credit... The customer may apply if they have experienced a water leak in their service line and can prove that such leak has been promptly corrected. Customer service lines are defined as the line from the water meter on the customer's side to the home. Exemptions from credits include leaks in irrigation systems, toilets, and faucets. The application shall include:

- **Process:** The General Manager shall review all application forms received by customers. The General Manager shall approve a credit of up to 50% of the differential of the highest billing period invoice during the tenure of the leak...

P.O. Box 6064
Los Osos, CA 93412

Offices:
2122 9th Street, Suite 110
Los Osos, CA 93402

Phone: 805/528-9370
FAX: 805/528-9377

www.losososcsd.org

- Disputes: Any customer that disputes a determination by the General Manager may seek Board of Directors review of said determination by paying the established fee and making written application to the Board of Directors, in care of the General Manager, within ten (10) business days of the General Manager's decision. The decision of the Board of Directors shall be final.
- All credits are suspended completely if and when the District reaches Stage III of the Water Shortage Contingency Plan.

Staff is requesting the UAC to review both documents and policies and make any recommended changes. The changes will be presented to the Board of Directors for review at their March 7, 2019 Board meeting.

Financial Impact

No financial impact at this time.

Attachments

D. Staff shall prepare and keep complete and accurate records concerning tampering with District's service systems. The District Manager shall review such records and shall decide appropriate legal action to be taken by the District. If there is more than one such tampering violation for the same property within any five year period, the Board shall hold a public hearing to consider permanent disconnection of water service to the property, or such other remedies as the Board deems appropriate.

2.01.19 District Rates, Charges and Fees

A. Water rates, charges and fees:

Water rates are set forth in Appendix A (previously adopted by Resolution 2017-17).

2.01.20 Credits for Fixing Water Leak (Adopted 12/4/2014)

A. Application: The General Manager shall make available to any customer an application form that customers can use to apply for a credit. The customer may apply if the current bill is 50% greater than normal usage during the same period the prior year. Prior to being considered for a leak adjustment, the customer must pay an amount equal to the same usage as the previous year or same usage as previous bill if they have not owned the home for a year. The customer may apply if they have experienced a water leak in their service line and can prove that such leak has been promptly corrected. Customer service lines are defined as the line from the water meter on the customer's side to the home. Exemptions from credits include leaks in irrigation systems, toilets, and faucets. The application shall include:

- The date of discovery of the leak;
- The date of repair;
- Evidence such as dated plumbing bills and receipts for materials and supplies related to the leak repair; and
- The signature of the water customer.

B. Process: The General Manager shall review all application forms received by customers. The General Manager shall approve a credit of up to 50% of the differential of the highest billing period invoice during the tenure of the leak and the average of all invoices for said customer over the last twelve-month period if the General Manager, in his/her discretion, finds:

1. The leak was related to a physical break in the customer's service line; and
2. The leak was promptly repaired after the discovery; and
3. The customer has not received an LOCSO water leak credit during the preceding twenty-four (24) month period.

C. Disputes: Any customer that disputes a determination by the General Manager may seek Board of Directors review of said determination by paying the established fee and making written application to the Board of Directors, in care of the General Manager, within ten (10) business days of the General Manager's decision. The decision of the Board of Directors shall be final.

D. All credits are suspended completely if and when the District reaches Stage III of the Water Shortage Contingency Plan.

E. No leak adjustments will be given for incidents due to sewer lateral connection work.

LOS OSOS COMMUNITY SERVICES DISTRICT WATER SHORTAGE CONTINGENCY PLAN

Stage	Reduction Target	Climate Trigger (MEDIAN RAINFALL 17 INCHES)	CHLORIDE TRIGGER (8th or 10th Street Wells - Zone D)	TDS TRIGGER (8th or 10th Street Wells - Zone D)	CLIMATE & WATER QUALITY REQUIREMENTS TO EXIT WATER SHORTAGE STAGES (DE-TRIGGER)	PROHIBITIONS
STAGE I ALERT Customers: Residential Allocation: 183 gal/day	5%	Rainfall total as March 31: < than median (17 in.) for current year	N/A	N/A	Receive rainfall >= median by March 31	<ul style="list-style-type: none"> All outdoor irrigation of vegetation shall occur only between dusk and dawn. The use of potable water to wash sidewalks, walkways, driveways, parking lots, open ground and other hard-surface areas by direct application shall be prohibited. The use of non-drinking-water fountains, except for those using recirculated water, shall be prohibited. Use of water which results in flooding or run-off in gutters or streets shall be prohibited.
STAGE II WARNING Customers: Residential Allocation: 174 gal/day	15%	Stage I plus rainfall total as of March 31: <= 32 in. for over two yrs. or <= 48 in. over three yrs. or 65 in. over four yrs. or 81 in. over five years	N/A	N/A	Receive rainfall >= median by March 31	<p>In addition to Stage I conservation measures:</p> <ul style="list-style-type: none"> Use of water from fire hydrants shall be limited to fire suppression and/or other activities immediately necessary to maintain health, safety and welfare of residents within the boundaries of the Los Osos Community Services District. The use of District potable water for construction projects shall be prohibited. The washing of automobiles, trucks, trailers, boats and other types of mobile equipment not occurring upon the immediate premises of a commercial car wash and/or commercial service station shall be prohibited unless residents have an automatic shut-off hose nozzle and do not allow water to run off their property. The use of potable water to irrigate lawns, landscape plantings, groundcovers, and shrubs shall be limited to prescribed days and hours. Irrigation shall only occur between dusk and dawn, and shall only occur on Wednesday and Sunday for <u>even</u> numbered addresses, and Tuesday and Saturday for <u>odd</u> numbered addresses. Community recreational facilities shall be exempt from this prohibition. Water main flushing shall only occur in emergency situations as declared by the General Manager.
STAGE III EMERGENCY Customers: Residential Allocation: 50 gal/day/occupant NO TRANSFERS ALLOWED	25%	Stage I plus rainfall total as of March 31: <= 29 in. for over two yrs. or <= 43 in. over three yrs. or 58 in. over four yrs. or 72 in. over five years Stage III shall be enacted no earlier than April 2015. Declared by BOD 4/2/2015 – Based on Climate Trigger ONLY Modified on 5/7/2015	150 mg/l	700 mg/l	Receive rainfall >= median by March 31. If in Stage III due to water quality, two consecutive semi-annual samples must be below trigger concentrations to exit Stage III	<p>In addition to Stage I & II conservation measures:</p> <ul style="list-style-type: none"> Irrigation of community recreational facilities and residential edible crops shall be exempt from this prohibition. Penalties up to 2 times the established rate for usage above the allocation. No leak adjustment credits will be awarded No new Intent to Serve applications No allocations may be transferred to another property
STAGE IV SEVERE Customers: Residential, Commercial Allocation: 45 gal/day/ occupant NO TRANSFERS ALLOWED	35%	Stage I plus rainfall total as of March 31: <= 26 in. for over two yrs. or <= 38 in. over three yrs. Or 51 in. over four yrs. Or 64 in. over five years, Stage IV shall be enacted no earlier than November 2015	250 mg/l	850 mg/l	Receive rainfall >= median by March 31, transition to Stage II for current year. If in Stage IV due to water quality, two consecutive semi-annual samples must be below trigger concentrations to exit Stage IV	<p>In addition to Stage I, II, & III conservation measures:</p> <ul style="list-style-type: none"> Irrigation of community recreational facilities and residential edible crops shall be exempt from this prohibition. New water connections to the District water system shall be prohibited Commercial allocation 10% below baseline Penalties up to 4 times established rate may be applied No allocations may be transferred to another property
STAGE V CRITICAL ALL CUSTOMERS Allocation: 42 gal/day/ occupant NO TRANSFERS ALLOWED	50%	Stage I plus rainfall total as of March 31: <= 17 in. for over two yrs. or <= 26 in. over three yrs. or 34 in. over four yrs. or 43 in. over five years	500 mg/l	1,000 mg/l	Receive rainfall >= median by March 31, transition to Stage II for current year. If in Stage V due to water quality, two consecutive semi-annual samples must be below trigger concentration to exit Stage V	<p>In addition to Stage I, II, III, & IV conservation measures:</p> <ul style="list-style-type: none"> Commercial allocation 15% below baseline Penalties up to 4 times established rate may be applied No allocations may be transferred to another property

ITEM 6

**UPDATE OF FEBRUARY 6, 2019
WATER RESOURCE ADVISORY
COMMITTEE MEETING**

February 20, 2019

To: LOCSB Board of Directors
LOCSB Utility Advisory Committee

From: Chuck Cesena, UAC Chair 

Subject: Notes from February 6, 2019 San Luis Obispo County Water Resources Advisory Committee Meeting (WRAC)

Attached is the agenda and staff reports for the above referenced meeting, which I attended on behalf of the District; of particular interest to Los Osos are Agenda Items 3b and 3e.

Item 3b references the recent minor adjustments to the LO groundwater basin boundaries made by the State Department of Water Resources. The removal of the southern fringe area refers to the exclusion of the area west of Sea Pines Golf Resort and south of Shark Inlet from our Basin. The minor northern fringe area refers to a small area along Los Osos Creek near South Bay Boulevard. The Warden Creek Sub-basin refers to the groundwater basin near Warden Lake, which is now considered a separate Sub-basin distinct from the Los Osos Sub-basin which provides our community drinking water.

Item 3e refers to the current status of the County program which allows new construction based upon retrofit credits.

Most of the meeting was spent on Agenda Item 4, the report from the Ad Hoc Subcommittee regarding additional water conservation measures that could be implemented by the County Board of Supervisors.

In accordance with Agenda Item 5, I intend to provide the WRAC with an update on the activities of the LO Basin Management Committee in the near future. Potential items for discussion include our efforts to divert stormwater runoff that now empties directly to the bay for use at the County water recycling facility (wastewater treatment plant), the controversy regarding our efforts to drill the new Program C well in a neighborhood of private wells and the County contracts regarding the sale of recycled water to dryland farmers. Please feel free to suggest any additional items to include in that update.

SAN LUIS OBISPO COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT
WATER RESOURCES ADVISORY COMMITTEE (WRAC)

SLO City Council Chambers
990 Palm Street, San Luis Obispo CA

Wednesday, February 6, 2019
1:30 pm

AGENDA

1.	Determination of a Quorum and Introductions	1:30 pm
2.	Approval of December 5, 2018 Meeting Minutes	1:35 pm
3.	Ongoing Updates: a. Rain & Reservoir Report b. Groundwater Basin Management Efforts c. Integrated Regional Water Management (IRWM) d. Stormwater Resource Plan (SWRP) e. Various County Water Programs, Policies, and Ordinances f. Open Reporting on Water Conservation Opportunities & Information	1:45 pm
4.	Report from Ad-Hoc Subcommittee on Additional Water Conservation Measures that can be submitted to the Board of Supervisors for Their Consideration and Consider Actions	2:00 pm
5.	Consider Scheduling Updates of Water Resources Issues from Each Group or Agency	2:30 pm
6.	Discuss Future Agenda Items	2:40 pm
7.	Public Comment	2:50 pm

--- Adjourn by 3:30 pm ---

Next Regular Meeting: March 6, 2019
 SLO City Council Chambers
 990 Palm St
 San Luis Obispo CA

<http://www.slocountywater.org/site/Water%20Resources/Advisory%20Committee>

Purpose of the Committee:

To advise the County Board of Supervisors concerning all policy decisions relating to the water resources of the San Luis Obispo County Flood Control and Water Conservation District. To recommend to the Board of Supervisors specific water resource and water conservation programs with recognition of the economic and environmental values of the programs. To recommend methods of financing water resource programs.

Excerpts from WRAC By-Laws dated August 15, 2017

MINUTES (DRAFT)

Chairperson: Andy Pease
Vice Chairperson: Linda Seifert
Secretary: Ray Dienzo

The following action minutes are listed as they were acted upon by the Water Resources Advisory Committee (WRAC) and as listed on the Regular Meeting agenda for **December 5, 2018** together with staff reports and related documents attached thereto and incorporated therein by reference.

The audio recording of the meeting and materials submitted to the WRAC are available online: <http://www.slocountywater.org/site/Water%20Resources/Advisory%20Committee>

Call to order at 1:30PM.

1. Determination of a Quorum and Introductions (0:13)

A quorum of 18 is established (12 is required).

2. Approval of November 7, 2018 Meeting Minutes (0:44)

A motion by Member L. Seifert and a second by Member C. Mulholland moves to approve the November meeting minutes with no changes. Minutes approved (16-0-2).

3. Ongoing Updates:

a. Rain & Reservoir Report

There are no comments.

b. Groundwater Basin Management Efforts

There are no comments.

c. Integrated Regional Water Management (IRWM)

There are no comments.

d. Stormwater Resource Plan (SWRP)

There are no comments.

e. Various County Water Programs, Policies, and Ordinances

There are no comments.

f. Open Reporting on Water Conservation Opportunities & Information (5:37)

Member E. Greening mentions that the Regional Water Quality Control Board will be meeting in San Luis Obispo at their headquarters, December 6th, 2018.

Member G. Grewal mentions the buying offset fee for water to develop a new home in the Paso and Nipomo Mesa basin. WRAC members express interest in hearing an update on the program. Water Offset Program will be agendized in a future WRAC meeting.

Member L. Chipping mentions the basin boundary returned results for modifications to Los Osos and Heritage Ranch.

g. Schedule for 2019

There are no comments.

4. Report from Ad-Hoc Subcommittee of their Review of the 2016-2018 Water Section of the Resource Summary Report and Consider Actions (17:49)

County Staff Brian Pedrotti and County Staff Ben Schuster speak about work on the Resource Summary Report. County Staff Brian Pedrotti states that comments regarding the final draft Resource Summary Report should be made by December 20th.

Member G. Grewal states that the Resource Summary Report does not attempt to evaluate the water supply and therefore there is no reason to make a recommendation. He states that the Resource Summary Report does not mention the unincorporated population and safe yield. He also states concern with the CASGEM information. In addition, he mentions the lack of listed amounts of water by source such as Nacimiento, Salina's River, and State Water.

Member E. Greening states that the Resource Management System does not mention the fractured rock areas. He also states that the view of the county's water picture should not be on the Resource Management System alone due to the lack of comprehensiveness.

Member Alternate C. Mulholland in speaking for Member S. Luft states a concern on item 6 page 1, regarding the language on the level of severity 3.

Member J. Garing states representation for the Northern Cities Management Area. He also states that comments made by WRAC during the previous RSR was not reflected in the latest Resource Summary Report. Member J. Garing also states that their consultant's groundwater model confirms level of severity 3 in the Nipomo Mesa Management Area. And finally, he recommends a method to help the Nipomo Community Service District fund supplemental water projects.

Member T. Walters states that it would be helpful to the Board to have implementation goals for each water area by having the status of available water.

Member D. Peterson expresses support for funding supplemental water projects.

Member L. Chipping mentions that 25 of 27 water purveyors increased deliveries. She also suggests a recommendation to look at the whole picture for all county water

purveyor deliveries. Member L. Chipping makes a recommendation to start to look at implementing mandatory water conservation measure at level of severity 2.

Member C. Replogle states that SGMA does not apply to the portion of Santa Maria Basin that is under the issue of litigation, the statement is a legal determination that maybe incorrect.

Member L. Seifert asks on the uses of the Resource Summary Reports.

Member G. Grewal states the importance of the safe yield number. He also mentions concern that the City of Paso Robles is not using all its share of Nacimiento water but continuing to use groundwater.

Member C. Mulholland and a second by E. Greening moves to forward the committee and subcommittee comments onto the County Planning and Building Department Motion carries by voice vote. To reflect the range of expertise in specific geographic areas and specialties, comments will be submitted on behalf of individual WRAC members rather than on behalf of the committee as a whole.

5. Presentation on Water Conservation Practices on Winery Operations by Jason Yeager, from Niner Winery and Member Representative of Agricultural-At Large (53:50)

Member J. Yeager speaks on several strategies. One strategy is drop control, which is a system that monitors: weather, soil moisture, evapotranspiration. The system controls irrigation and detects leaks in the system. Another monitoring system is a pressure chamber, which takes putting a leaf in the pressure chamber, measured in bars. Plants start seeing stress at 9 bars and during a typical summer day the upper limit is 14 – 15 bars. Reservoir collects recycled water, collects rain, and is covered to prevent evaporation. All hoses in the production area have shut offs. A variable fluid drive is also used as a well pump or pond pump, allowing it to pump at a certain level without over-pumping a well. Pressure compensating emitters are also used. Root stocks are used to tolerate lime and nematodes, some of which are drought resistant while others are not. The vineyard uses 0.2 acre-feet/year while most vineyards typically uses 1-2 acre-feet/year. Frost protection overhead sprinklers can protect down to 23°F, which uses up 90 gallons-per-minute/per acre. Micro-sprinklers for frost protection can protect down to 26°F, with 16 gallons-per-minute/per acre. With a strong inversion layer, wind machines can protect down to 28°F. Keyways can be used to collect runoff to recharge into aquifers. Creating incentives for wind machines can save a lot of water. Consider removing a sunset clause on irrigated acreage, requiring the land to be planted to retain irrigated water rights.

6. Report from Ad-Hoc Subcommittee on Additional Water Conservation Measures that can be submitted to the Board of Supervisors for Their Consideration and Consider Actions

No Report.

7. Discuss Future Agenda Items and Agendize Status Updates from Member Stakeholders (1:36:50)

Member E. Greening mentions the live stream agreement, dam safety improvements, overall costs, and upstream riparian zone regarding the Salinas Reservoir expansion.

8. Public Comment (1:40:20)

Member B. Gresens will be retiring and no longer be a voting member.

Meeting adjourns at 3:15PM.

TO: Water Resources Advisory Committee

FROM: Ray Dienzo, Supervising Water Resources Engineer

DATE: February 6, 2019

SUBJECT: Agenda Item 3: Ongoing Updates

Recommendation

Receive updates on various ongoing efforts.

Discussion

- a) **Rain & Reservoir Report:** See attached report.
- b) **Groundwater Basin Management Efforts**

BOARD OF SUPERVISORS MEETINGS AND BASIN UPDATES:

Basin	Update:
<p>Los Osos Basin Fringe Area</p>	<p>On November 29, 2018, DWR published the Draft Recommendations for the Basin Boundary Modifications Request (BBMR). A summary of DWR's Draft Recommendations for the Los Osos Basin BBMR are listed below:</p> <ul style="list-style-type: none"> • DWR approved the creation of two jurisdictional subbasins: Los Osos Subbasin and Warden Creek Subbasin • DWR approved the removal of the southern fringe area • DWR denied the removal of the minor northern fringe area <p><u>DWR's Steps to Finalize Basin Boundaries & Priorities:</u></p> <ul style="list-style-type: none"> • February 2019 - DWR Final Basin Boundary Modifications released • April/May 2019 - DWR reprioritizes basins/subbasins (using modified boundaries) <p>More information on DWR's basin boundary modification process and prioritization process, please visit: https://water.ca.gov/Programs/Groundwater-Management/Basin-Prioritization https://water.ca.gov/Programs/Groundwater-Management/Basin-Boundary-Modifications</p>
<p>Atascadero Basin</p>	<ul style="list-style-type: none"> • DWR's recently released Prioritization of Groundwater Basins designated the Atascadero Basin as "very low priority" and, therefore, no longer subject to SGMA. • The Atascadero Basin GSA has decided to continue with development of a Groundwater Sustainability Plan for the Atascadero Basin. • In addition to the County's Atascadero SGMA Page, further updates on the Atascadero Basin GSA can be found by visiting: www.atascaderobasin.com/
<p>Santa Maria</p>	<ul style="list-style-type: none"> • On November 29, 2018, the California Department of Water Resources (DWR) published the 2018 Bulletin 118 Basin Boundary Modifications –

<p>Basin Fringe Area</p>	<p>Draft Decisions. The BBMR draft decisions including the Santa Maria Basin may be found at DWR's Basin Boundary Modifications website: https://water.ca.gov/Programs/Groundwater-Management/Basin-Boundary-Modifications.</p> <ul style="list-style-type: none"> • Release of Final Modifications by DWR will be in February 2019. • On January 29, 2019, County Board approved the submittal of a Notification of Intent to DWR to initiate development of a groundwater sustainability plan (GSP) for the "fringe areas" of the Santa Maria Basin.
<p>Paso Robles Basin</p>	<ul style="list-style-type: none"> • The Paso Basin Cooperative Committee is receiving and recommending that the GSAs in the Paso Basin receive and file Draft GSP Chapters as they are developed for the Paso Basin. To date, the Draft GSP Outline and Draft Chapters 1-5 and a part of Chapter 11 (the Communication and Engagement Plan) have been received and filed by the County Board of Supervisors. • In addition to the County's Paso SGMA page, Draft Chapters and Comment Forms can be found by visiting: www.pasogcp.com • The next regular meeting of the Paso Basin Cooperative Committee is April 24, 2019 at Paso Robles City Council Chambers.
<p>Cuyama Basin</p>	<p>The Cuyama Basin GSA Board of Directors meet on the first Wednesday of every month starting at 4 pm in Cuyama, CA. The next scheduled meeting is February 6, 2019. Meeting topics will include sections of the groundwater sustainability plan, basin model, management actions, and water budget, as well as public outreach and budget. For additional basin information, please visit: http://cuyamabasin.org/cuyama-gsa-board</p>
<p>San Luis Obispo Basin</p>	<ul style="list-style-type: none"> • On October 16, the Board approved and submitted a Notification of Intent to initiate development of a GSP for the San Luis Obispo Valley Groundwater Basin. • Interested parties are encouraged to participate in the basin specific efforts by attending the meetings of the Groundwater Sustainability Commission of the San Luis Obispo Basin (Commission). • The Commission Consultant Selection Committee had selected a consultant to develop a GSP. The procurement process is anticipated to be completed by Winter 2019.

County SGMA website - An interactive mapping tool is available for each medium and high priority basin in the county. Residents can verify whether a specific parcel is within a priority basin boundary, and, therefore, whether the parcel is subject to SGMA requirements. The website also includes other informative materials, such as SGMA fact sheets and recent presentation materials. Visit the website to sign up for the County's SGMA email list, and to visit basin-specific pages at: www.slocountywater.org/sgma

WRAC members and interested stakeholders are encouraged to join the various mailing lists for groundwater basin management efforts:

San Luis Obispo County's SGMA Mailing List

<http://www.slocountywater.org/sgma>

California Department of Water Resources (DWR) SGMA Mailing List

<http://www.water.ca.gov/groundwater/sgm/subscribe.cfm>

c) Integrated Regional Water Management (IRWM)

The Department of Water Resources is expected to release the final Prop 1 Project Solicitation Package soon.

In preparation of this opportunity, the RWMG will meet February 6th at 10am to discuss the grant opportunity. The meeting is held at the SLO City/County Library Community Room.

DWR Grant website: <https://water.ca.gov/Work-With-Us/Grants-And-Loans/IRWM-Grant-Programs/Proposition-1/Implementation-Grants>

The 2019 IRWM is being finalized this quarter. County staff expects to have a public draft presentation in April. More information regarding this public draft presentation will available once the plan is close to completion.

To stay up-to-date on all things IRWM, sign up for the email list, located at:

<https://slocountywater.org/site/Frequent%20Downloads/Integrated%20Regional%20Water%20Management%20Plan/>

d) Stormwater Resource Plan

California Senate Bill No. 985 requires the development of a stormwater resource plan for public agencies to receive grant funds for stormwater and dry weather runoff capture projects.

Currently, the City of Arroyo Grande and the County of San Luis Obispo are collaborating to develop a region-wide SWRP. The SWRP must be compliant with the State Water Board's SWRP Guidelines adopted December 15, 2015 and the California Water Code Section 10561-10573. The work completed by the City of Arroyo Grande with Grant Agreement D1612607 is being combined with Task 12 of the County's Department of Water Resources IRWM Planning Grant (Agreement No. 4600011892).

The goals of the County of San Luis Obispo SWRP are to identify and prioritize stormwater and dry weather runoff capture projects in the county through detailed analyses of watershed conditions and processes, surface and groundwater resources, and the multiple benefits that can be achieved through stormwater-related capital projects and other programmatic actions.

The PMT has compiled a Project List through the solicitation of projects from stakeholders, TAC Leads, and other interested organizations and agencies. Stakeholder and public outreach meetings have been

used to disseminate information and to solicit both proposed projects as well as suggested approaches to project prioritization.

Project Updates

- The SWRP deadline for submittal of the Final draft to the State Water Resources Control Board and the Department of Water Resources is now February 28, 2019 due to an extended review and comment period by the SWRCB.
- As part of the match funding for the Prop 1 grant, the City of Arroyo Grande has contracted with WSC to develop a Santa Maria Groundwater Basin model to evaluate the benefits of a few of the projects submitted to the SWRP. Dan Heibel from WSC is the project manager for the groundwater model development.

For more information see the County of San Luis Obispo's SWRP
<https://www.slocounty.ca.gov/Departments/Public-Works/Committees/Stormwater-Resource-Plan.aspx>

For questions, contact:
Larissa Clarke, SWRP Project Manager
Email: lclarke@coastalrcd.org
Phone: (805) 772-4391

e) Various County Water Programs, Policies, and Ordinances

Countywide Water Conservation Program

<http://www.slocountywwcp.org>

Paso Robles Groundwater Basin – The County is continuing to process building permits that are subject to the fees of the PRGWB. The Cash for Grass program offers \$1 per square foot up to a maximum rebate amount of \$6,000 per household. The Washer Rebate Program offers \$250 per household when replacing an old washer with a new water efficient washer (replacement must save at least 15 gallons). The Plumbing Retrofit Program offers homeowners the opportunity to replace old fixtures with new water efficient fixtures in their homes (limited to 2 toilets, 2 showerheads, and 2 faucet aerators) at no cost from the homeowner.

Nipomo Mesa Water Conservation Area – The County is continuing to process building permits subject to the fees of the NMWCA. The Cash for Grass program offers \$1 per square foot up to a maximum rebate amount of \$6,000 per household. The Washer Rebate Program offers \$250 per household when replacing an old washer with a new water efficient washer (replacement must save at least 15 gallons). The Plumbing Retrofit Program offers homeowners the opportunity to replace old fixtures with new water efficient fixtures in their homes (limited to 2 toilets, 2 showerheads, and 2 faucet aerators) at no cost from the homeowner.

Los Osos – The retrofit to build and retrofit on sale program within the community of Los Osos is allowing property owners to retrofit washers within and outside the prohibition zone to acquire retrofit credits. At this time, to earn enough credits to build one single family residence (300 credits), a property owner would need to replace 6-8 washers; a total cost ranging between \$4,000-\$6,000.

For questions, contact:
Kylie Hensley, Planner
Email: khensley@co.slo.ca.us
Phone: (805) 781-4979

f) Open Reporting on Water Conservation Opportunities & Information

WRAC members or members of the public may openly report on any topic related to water conservation including opportunities to be a part of a water conservation focus group, reporting back on water conservation groups that they are a part of, or providing information on water conservation items.

A - Report generated at 10:15 A.M. on 01/29/2018
 B - Due to an equipment malfunction, not all rain was recorded at this site.

Notes:
 This table contains provisional data from automated gauges and has not been verified.
 All units reported in inches.

Reservoir Update

Reservoir	Date	Water Elevation (ft)	Spillway Elevation (ft)	Storage (acre-feet)	Capacity (%)
Nacimiento Reservoir	January 28, 2019	696.4	787.75 - 800.0 (weirgate fully inflated)	58,043	15%
	January 28, 2018	751.5		156,125	41%
Lopez Reservoir	January 28, 2019	480.8	522.7	20,062	41%
	January 28, 2018	490.4		25,220	51%
Salinas Reservoir (Santa Margarita Lake)	January 28, 2019	1,296.0	1300.7	20,527	66%
	January 28, 2018	1,294.3		19,425	61%
Whale Rock Reservoir	January 23, 2019	188.0	218.3	28,310	75%
	January 23, 2019	196.7		28,677	74%
Twitchell Reservoir	January 28, 2019	N/A	651.5	0	0%
	January 25, 2018	550.7		8,105	4%

Note 1: Historically, Twitchell Reservoir elevation gauge does not report values below 539 ft. Twitchell Reservoir was designed for protection from flood and drought. Excess rain runoff is stored in the reservoir protecting the valley from flood, then water is released as quickly as possible while still allowing it to recharge the groundwater basin.
 Note 2: In May 2014, the Whale Rock Commission adopted a new Bathymetric Study and Volumetric Analysis with new lake capacity and spillway elevation values. Those new values are reflected in this report.

DATE: February 6, 2019

SUBJECT: Agenda Item 4: Report from Ad-Hoc Subcommittee on Additional Water Conservation Measures that can be submitted to the Board of Supervisors for Their Consideration and Consider Actions

Recommendation

Receive report from Ad-Hoc Subcommittee on Additional Water Conservation Measures that can be submitted to the Board of Supervisors for Their Consideration and Consider Actions

Discussion

During the WRAC meeting March 7, 2018, a Water Conservation Subcommittee was formed to develop recommendations on additional water conservation measures that can be recommended to the Board of Supervisors. Andy Pease, David Chipping, Linda Chipping, Linda Seifert, and Steph Wald volunteered to participate in the sub-committee. The subcommittee initially met on May 9, 2018. George Kendall joined the subcommittee on July 9th.

The group met on August 6th, Sept 17th, October 31th, and Nov 26th, 2018.

In the most recent meeting on January 10, 2019, the group finalized their recommendations. The updates are summarized in the attached draft letter and the chart of recommendations.

Attachments:

- Draft Letter – Findings of the WRAC Water Conservation Ad Hoc Committee
- WRAC Ad Hoc Committee Water Conservation Measures Chart

Honorable Debbie Arnold
Chair, Board of Supervisors
County of San Luis Obispo
1050 Monterey Street
San Luis Obispo, CA 93408

Subject: Findings of the WRAC Water Conservation Ad Hoc Committee

Honorable Supervisor Arnold:

As you know, the Water Resources Advisory Committee (WRAC) was formed to advise the Board of Supervisors [BOS] on policy issues that relate to water resources and to propose recommendations on water resource and water conservation programs (WRAC Bylaws). In furtherance of that mandate, in 2018 WRAC established a Water Conservation Ad Hoc Committee [AHC] specifically charged with investigating water conservation measures for our county that would enhance available resources and provide value to residents.

Over several months, the subcommittee evaluated possible measures in the following areas; (1) urban use, (2) agricultural use, and (3) groundwater recharge. The AHC met multiple times, reporting back to the WRAC membership as it progressed. It reviewed the county's current valuable water conservation efforts and researched other water conservation measures throughout the state. The meetings included representatives from the county Planning Department and City of San Luis Obispo water resources staff. The recommendations were presented to the full WRAC Board, which refined the water conservation measures.

The following recommendations are presented as measures that would further the efforts of water resilience for the county. Some of the measures would broadly benefit our entire county while others are more focused on non-SGMA basins, with the intention of avoiding future SGMA requirement mandates:

1) Convene a joint ALAB (Agricultural Liaison Advisory Board) and WRAC subcommittee to identify strategies to optimize water use and groundwater recharge in agriculture appropriate for our county.

- ALAB has established a water conservation subcommittee to work with a WRAC subcommittee.
- A substantial amount of agricultural water use in this county comes from groundwater.
- The shared interest and expertise of ALAB and WRAC could result in the identification and implementation of significantly beneficial strategies that will enhance the economic viability of the local agricultural community as well as conserve water resources on behalf of the all residents.

- 2) Recommend that WRAC work with the existing county Partners in Water Conservation to identify and implement additional urban landscape strategies and Best Management Practices**
- New landscape technologies and practices have been identified and should be introduced to a wider audience.
 - The importance of landscape training is an effective tool, and if made available to the public, would have a positive impact on water conservation efforts.
 - Through this methodology, best practices for compliance with current California regulations can be shared between jurisdictions.
- 3) Extend the implementation of water conservation measures to areas when designated as a Level of Severity II by the biennial RMS (Resource Management System)**
- It is easier and less costly to prevent excessive resource use before sustainability becomes untenable.
 - The LOS II water supply criteria states: "Water demand projected over 15-20 years (or other lead time determined by a resource capacity study) equals or exceeds the estimated dependable supply."
 - LOS III Water supply criteria states: "Demand projected over 15 years (or other lead time determined by a resource capacity study) equals or exceeds the estimated dependable supply; OR, the time required to correct the problem is longer than the time available before the dependable supply is reached."
 - Recognition that demand will soon exceed supply suggests that local policymakers should address strategies that will address supply/demand issues.
- 4) Direct staff to plan, budget and prepare hydrological studies for non-SGMA basins and fractured rock sources where needed, to identify water resource at-risk areas.**
- Such studies would be a useful tool for agricultural and population land use planning for current and future generations.
 - WRAC would recommend that the BOS identify ways thereafter to implement resource management proactively.
- 5) Recommend that WRAC work with staff to formalize, maintain and make available to all county water users a Resource Library of Best Management Practices on water conservation supply and demand practices.**
- A readily available library would be an up-to-date, one-stop easily accessed educational center, linking to other developed websites and programs. During its work, the AHC identified a host of valuable resources that could form the basis for this recommendation's implementation.
 - Increases motivation to incorporate additional water saving techniques and skills.

6) Direct staff to analyze and expand groundwater recharge opportunities in both rural and urban environments.

- As the BOS is aware, water demand conservation practices alone will not be sufficient to meet the challenge of sustainability going forward.
- Opportunities for groundwater recharge during wet periods should be identified and necessary resources budgeted for implementation to increase water supply resources.

7) Continue to support WRAC's inclusion of informational presentations on water conservation, recharge and new water sources as a part of the regular meetings.

- WRAC is an excellent forum to keep a large, diverse membership informed and provides for an exchange of diverse views and ideas.
- Members have the opportunity to address questions to speakers and share their own thoughts on matters of interest and concern.
- Exposes members to ideas, techniques that may be adaptable to their needs. Among the future topics expected to be addressed are:
 - Watershed wise landscape systems
 - Evolving technologies for desalination
 - Impacts of climate change on water resources
 - Healthy Soil Initiative

We appreciate your consideration and look forward to continuing our work for water resilience and regional cooperation throughout our county. We also look forward to working with the BOS in furtherance of the aforementioned recommendations and to addressing any questions or thoughts you may have.

On February 6, 2019, the WRAC membership approved this report for consideration by your Board.

Respectfully submitted,

Andy Pease
Chairperson
Water Resources Advisory Committee

cc: San Luis Obispo County Board of Supervisors, All Districts

Attachment: Water Conservation Measures Chart

WRAC Ad Hoc Committee Water Conservation Measures Chart

6-Feb-19			
		<u>Decrease Demand</u>	<u>Increase Supply</u>
	Water Conservation Measures	Urban	Agriculture
			Groundwater Recharge
I.	<u>Irrigation Systems</u>		
	New technologies/improvements for additional irrigation efficiencies	X	X
	Irrigation efficiency consultant program	X	X
	Develop a library of Best Management Practices	X	X
	Continue the county Mobile Irrigation Lab program, expand capabilities for additional on-farm water efficiency measures		X
	Expand the number of CIMIS (CA Irrigation Management Information System) weather stations in county, w/on-farm and online access		X
II.	<u>Rebates and Incentivizing Opportunities</u>		
	Irrigation Upgrade Rebates, including weather based irrigation controllers	X	X
	Tiered water meter pricing structures	X	
	Fund public water conserving landscape classes, offer rebates to attendees	X	
	Rebates or program incentives for water well meters - grants?		X
	Incentive for CIMIS program installation on farms		X
	Expand current county rebate programs to include additional conservation measures and to serve other areas	X	
	Incentive for gray water systems retrofits	X	
III.	<u>Educational Opportunities Developed / Expanded</u>		
	Engage/utilize RCDs, UCCE, Cal Poly Irrigation Training & Research Center for workshops, courses, continuing education courses	X	X
	Water-conserving landscape design classes for home owners	X	
	Initiate a program to showcase water conservation built projects	X	X
	Develop county rebate program for specific agricultural water conservation measures		X
	Develop and initiate agricultural water management plan courses, paired with incentives		X
	Develop/maintain a Best Management Practices Library for water resources conservation	X	X
	Identify and arrange for future speakers at WRAC meetings or other venue	X	X
	Showcase projects that demonstrate effective and/or unique conservation practices	X	X

WRAC Ad Hoc Committee Water Conservation Measures Chart

IV.	<u>Groundwater Recharge</u>			
	Promote programs for stormwater capture on private and public properties	X	X	X
	Promote water infiltration rather than runoff to sidewalks, streets and gutters	X		X
	Identify legal/regulatory constraints for stormwater capture, off-creek recharge	X	X	X
	Conduct hydrologic studies for important non-SGMA basins or fractured rock areas of county			X
	Land use planning should protect potential recharge areas	X	X	X
	<u>Other Measures</u>			
	Promote/encourage on site soil moisture and evapotranspiration monitoring		X	
	Where appropriate/feasible, use wind machines for frost control		X	
	Reduce pond evaporation loss		X	X
	Conduct WRAC and ALAB subcommittees meetings to identify improved ag water efficiency measures		X	X
	Identify and arrange for future speakers at WRAC meetings or other venue	X	X	X
	Increase opportunities for recycled water use	X	X	X
	Require on-site gray water recycling in new development	X		
	Create/utilize a system of triggers to identify negative water resource impacts	X	X	

TO: Water Resources Advisory Committee

DATE: February 6, 2019

SUBJECT: Agenda Item 5: Consider Scheduling Updates of Water Resources Issues from Each Group or Agency

Recommendation

Schedule updates of water resources issues from each WRAC group or agency that can be added to the agenda for each month of the 2019 WRAC meetings.

Discussion

As stated in the WRAC By-laws, the purposes of the WRAC are to “advise the Board concerning all policy decisions relating to the water resources”; to recommend “specific water resource and water conservation programs with recognition of the economic and environmental values of the programs”; and to recommend “methods of financing water resources programs.”

Using ideas from all the groups and agencies represented by the WRAC would supply a source of considerations that could lead to valuable and relevant County-wide policy recommendations.

Article II.8 of the WRAC By-laws state, “Members are encouraged to provide an update on water resource issues relevant to their group or agency at least once per year.”

These updates should bring issues that are important to each group or agency and would foster a flow of ideas that may develop into County-wide significance.

TO: Water Resources Advisory Committee

FROM: Ray Dienzo, Supervising Water Resources Engineer

DATE: February 6, 2019

SUBJECT: Agenda Item 6: Discuss Future Agenda Items

The WRAC Secretary, in cooperation with the Chairperson, prepares the agenda for each WRAC meeting. Inclusion of suggested future agenda items on the agenda will be limited to include review for consistency with District and Board of Supervisors priorities, the mandate of the WRAC, and available time.

Areas of Interest

- In-stream requirements for ecosystem species
- Projects/Programs that integrate flood management, water quality and groundwater recharge
- On-site water/energy efficiency practices (e.g. energy generating greywater systems, septic system conversions)
- Well permitting regulation as a tool for groundwater management
- Desalination opportunities
- Updates from Member Stakeholders
- Consider recommending to the Board that groundwater pumpers within groundwater basins that have Groundwater Sustainability Agencies (GSA) have direct representation within their GSA's.
- Impact of climate change on water resources – speaker from Central Coast Water Board

- Mark Battany – soil moisture, evapotranspiration
- Urban water loss audits, how to recover water loss, costs
- Partners in Water Conservation update
- Urban Water and Carbon Sequestration
- Healthy Soils Initiative
- Pajaro recharge basins speaker
- County legislative platform for water resources issues

Ongoing Updates/Regular Items – other items not shown here can be seen in the previous month's agenda

- Groundwater basin management Updates
- Various County-led water programs, policies and ordinances
- Open reporting on water conservation opportunities and information

Excerpt from WRAC By-laws dated August 15, 2017

Administration: The Secretary, in cooperation with the Chairperson, shall prepare the agenda for each regular and special meeting of the WRAC. Any WRAC member may contact the Secretary and Chairperson and request that an item be placed on the regular meeting agenda no later than 4:30 p.m. twelve calendar days prior to the applicable meeting date. Such a request must be also submitted in writing either at the time of communication with the Secretary or delivered to the County Public Works Department within the next working day. Consideration of the request by the Secretary, in cooperation with the Chairperson, for inclusion on the agenda will be limited to include review for consistency with District and Board of Supervisors priorities, the mandate of the WRAC, and available time.
