- **SLO County Water Conservation Study Kickoff.** County Planning and Building Department has engaged a consultant to evaluate the Water Offset Program and the conservation potential in Los Osos. This will include updating the program's water savings estimates to incorporate the significant changes in water consumption patterns since the water Offset Program was adopted in 2008. It is our hope that the results of the study will help guide the future of the District's Water Conservation Program. Staff will be working closely with County staff and supplying water use data during the duration of the project which is estimated to take three months.

- **Administrative Services Manager (ASM) Recruitment.** With the announced departure of our current ASM in February, we are currently advertising the position in hopes of finding a replacement prior to her leaving so there can be some overlap and training. The job description, requirements and compensation package information are available of the District's website. This is a very important position within the District's organization and we encourage qualified candidates to apply on or before the January 14, 2022 deadline.

- **Drought Reminder.** We want to remind the community even with the recent rains, it is still important to pay close attention to your water use, turnoff your outdoor irrigation and always check for leaks around your home and yard. If you need assistance, please call the office at 805-528-9370.
