

Los Osos Community Services District STAFF REPORT

TO: Board of Directors, LOCSD
FROM: Tom Cross, Director
SUBJECT: October 22, 2026, LOCAC Meeting Report

The Los Osos Community Advisory Council (LOCAC) meeting included updates regarding El Niño preparedness, the Sunnyside property acquisition, upcoming Community Services District activities, and emergency preparedness resources.

Supervisor Bruce Gibson reported that the County is actively preparing for potential El Niño impacts.

I provided updates on the CSD's Sunnyside acquisition efforts, the upcoming will-serve discussion, drainage projects, and I commented on the fire station open house that was on October 17th. General Manager Kwolek and I answered questions regarding how long the Sunnyside efforts are taking, the Sunnyside master plan steering committee, and drainage efforts.

The Council also reviewed a proposed residential development on Butte Drive and voted to recommend approval of the project.

Mr. Jalbert from the County Office of Emergency Services presented information on emergency preparedness, encouraging residents to visit ReadySLO.org and sign up for AlertSLO and Reverse 911 notifications.

Additional discussion focused on updating the LOCAC website, preserving archives of past meetings, and ensuring transparency in the use of County funds. The Council reached an informal consensus that financial decisions should be made transparently and agreed to consult with the County regarding expectations for the use of funds. Community outreach was also identified as a priority to help fill vacant Council positions.
